BEBO the PET 1 / 9

AI is powerful.

Getting to it is painful.

01

30+ seconds lost

Every time you open ChatGPT or Gemini from scratch — that's time gone.

02

Focus broken

Leaving your work to open a browser kills deep focus and flow.

03

Tab overload

You end up with 12 open tabs just to ask one question.

04

AI isn't there for you

You always have to go to AI. AI never comes to you.

Meet BEBO

A tiny AI robot that lives on your Windows desktop — always.

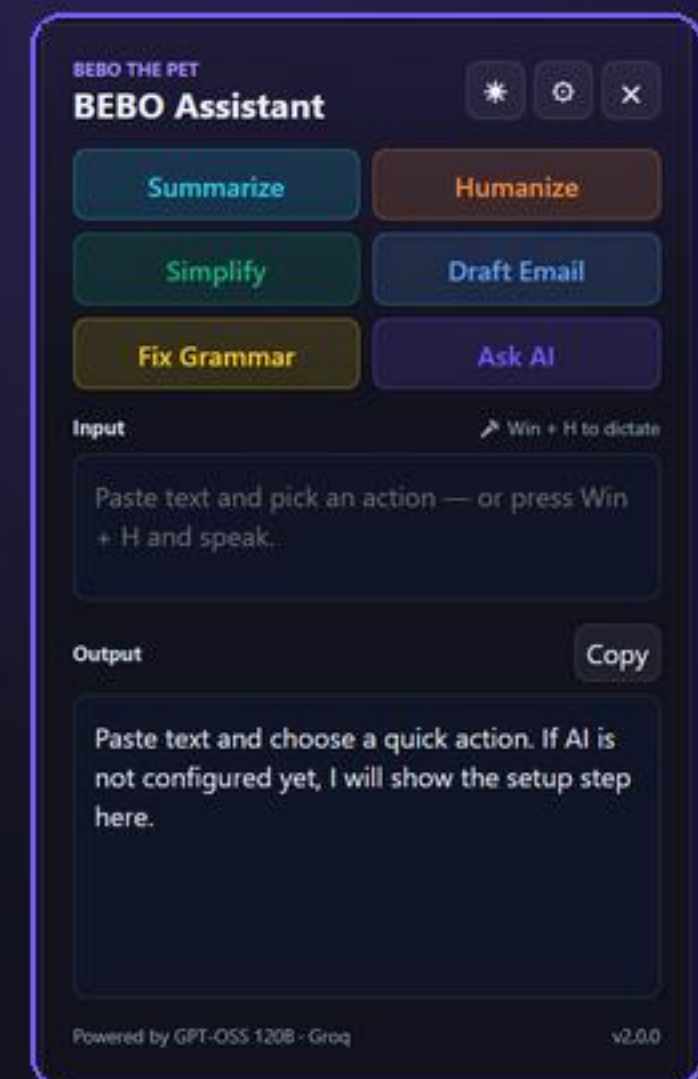

- Always visible — sits in desktop corner
- Click once → AI panel opens instantly
- 6 AI features, no browser needed
- AI result in under 2 seconds
- Zero context switching, ever

1,000

free AI requests / day

Global Shortcuts

- Ctrl+Shift+W** Wake BEBO
- Ctrl+Shift+B** Hide BEBO
- Ctrl+Shift+P** Show / Hide Panel

Real Panel UI (Ctrl+Shift+P)

6 AI Features Built In

All free. All instant.

SUMMARIZE

Condense any article, email or report into key points

HUMANIZE

Transform AI text into genuine human writing

SIMPLIFY

Complex jargon made instantly clear to anyone

DRAFT EMAIL

Professional emails from rough notes in seconds

FIX GRAMMAR

Corrects errors silently, keeps your voice intact

ASK AI

Free-form — ask anything, get expert-level answers

BEBO vs Browser AI

Full workflow — click to result

BEBO

~4 sec

total workflow

VS

Browser AI

~14 sec

total workflow

- No browser needed
- Always visible on screen
- One click = AI ready
- Zero context switching

- Open browser first
- Navigate to website
- Wait for page to load
- Leave your current work

4x faster workflow — every single time.

Multiply that by every task in your day.

Powered by the World's Fastest AI Inference

Model (Free Tier)	Speed	200-tok Task
BEBO (Groq + GPT-OSS 120B)	~500 tok/s	~0.4-0.6s [BEST]
Gemini 2.0 Flash (free)	200-300 tok/s	~0.8-1.2s
GPT-4o mini (free)	100-150 tok/s	~1.5-2.5s
Claude 3.5 Haiku (free)	100-150 tok/s	~1.5-2.5s
GPT-4o (limited free)	80-100 tok/s	~2.0-3.0s

Source: Groq published benchmarks | Tested with latest free-tier models (2026)

Groq uses custom LPUs — Language Processing Units — built for AI speed.

This is BEBO's hardware advantage.

BEBO the PET 6 / 9

100% Free. No Credit Card.

1,000

free AI requests / day

That's

10 tasks/min

all day, every day.

Platform	Free Model	Daily Limit	Card?
BEBO	GPT-OSS 120B	1,000 / day	Never
ChatGPT	GPT-4o mini	~50 msgs/3hr	No
Gemini	Gemini 2.0 Flash	~500 req/day	No
Claude	Claude 3.5 Haiku	~25 msgs/day	No

* Estimates based on publicly available free-tier limits (2026).

Get Started in 4 Steps

Less than 2 minutes.

01

Download BEBO

Direct download:

[github.com/bhavik8025/BEBO-the-PET/
releases/latest](https://github.com/bhavik8025/BEBO-the-PET/releases/latest)

BEBO.the.PET.Setup.exe

02

Get Free Groq API Key

Visit groq.com — free account. No credit card. Takes 30 seconds.

03

Paste Key & Launch

Run BEBO. Paste your key. Click Verify & Launch. Done!

04

Pin to Windows Startup

Win+R -> shell:startup -> Enter Create shortcut. BEBO starts with Windows.
